

REMARKS

Claim Amendments

Claims 2 and 4 are amended to recite γ -bisabolene. The specification supports this amendment on page 5, line 3: "Preferably the terpene of the bisabolene type is α -bisabolene or γ -bisabolene.

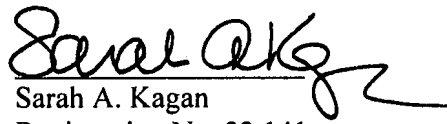

Claim 6 is amended to recite an isolated compound of trans- β -Ocimene and new claim 11 recites an isolated compound of claim 2. The specification supports these amendments on page 6, lines 10-11: "The compound used in the first or second aspect of the present invention can be obtained by isolating it from the appropriate plant indicated above."

Claim 7 is amended to recite "trans- β -Ocimene" rather than "the terpene compound." This amendment is supported, for example, within independent claim 6.

Claim 10 is canceled.

No new matter was added by this amendment.

Respectfully submitted,
